

qEEG and Neurotherapy Workshop

Prof. Juri. D. Kropotov

24th to 26th of April 2008
in London

Dear Friends and Colleagues,

The success of last year's QEEG course in London calls for an encore. Learning Recovery in London is pleased to announce their 4th annual spring workshop with Juri Kropotov, Director of Lab., Institute of the Human Brain, St. Petersburg, and Professor, Institute of Psychology, Norwegian University for Science and Technology, Trondheim.

Prof. Kropotov will present developments in their collaborative work from a research and a clinical perspective. The focus will remain upon application of EEG spectral analysis, event-related potentials and event-related de/synchronization for assessment of brain function and development of individually determined protocols for neurotherapy.

Highlights of the program include:

- Visual Inspection of EEG
- Spectral Analysis of EEG
- Cognitive Event Related Potentials
- Cognitive Event Related De/synchronization
- Normative Data Bases
- Neurofeedback as a Learning Procedure
- Transcranial Direct Current Stimulation
- Assessments and Protocols for ADHD
- Neurotherapy with Transcranial Direct Current Stimulation

Course Cost 24th to 26th is: €450 or £300 (or €150 / £100 a day)

Optional extra or stand alone day on the 27th run by Tony Steffert (€67/£50 for the day)

Introductory to capping up with Mitsar/WinEEG .

- ① Review of the 10/20 system,
- ② Applying an ECI electrode cap,
- ③ Checking impedances,
- ④ Recording of EEG and ERP's

This will be a practical day of applying electrode caps and recoding EEG's / ERP's
